LEGISLATOR ROB CALARCO ATTENDS ALTERNATIVE SEPTIC DEMO

NEW TREATMENT SYSTEMS OFFER ENVIRONMENTAL BENEFITS

Legislator Calarco looks on while Joseph Dinsieski from Wasterwater Works Inc. demonstrates the septic system.

(EAST PATCHOGUE) – Today Legislator Calarco attended an alternative septic demonstration in East Patchogue. The Suffolk County Department of Health Services is working with various companies to test systems at single family homes around the County. This particular system significantly reduces nitrogen as compared to traditional home septic systems, is less expensive to maintain and will have a great impact upon cleaning our waterways. Earlier this year homeowners entered a lottery in order to participate.
